GRiT

PROGRAM OVERVIEW · 2027-28

Skills students use for life. Training teachers keep.

GRiT is a neuroscience-based social-emotional learning and leadership curriculum for K-12. Students learn how their brains respond to stress, emotions and relationships, then practice simple tools to regulate, connect and lead, following a mountain climb from Base Camp to the Summit.

One program for every grade band

Program	Grades	Format	Built for
GRiTelementary	K-5	Short daily moments woven into morning meeting and classroom routines	Early regulation, belonging and habits
GRiTsel	6-8	36-week advisory, about 20 minutes a week	A shared language for the whole school
GRiTspark	6-8	45-day exploratory elective	Relational intelligence and early leadership
GRiTedu	9-12	Semester course, 90 days and about 75 hours	Leadership, CTE, health and wellness pathways

What every school gets

- **Teacher training and certification** as GRiT Lead Learners
- **Ready-to-teach lessons** with slides, speaker notes and student exercises
- **Student materials**, including journals where the program uses them
- **GRiT Compass**, a live dashboard where short check-ins inside each lesson show counselors and leaders how students are doing now, not in June
- **Ongoing support** from the RewiredEDU team all year

Built in Wisconsin classrooms

GRiT was created and tested in North Fond du Lac, Wisconsin, where it has run for multiple years.

+15%
mindset and ownership

~60%
fewer disciplinary interventions

> *"The first curriculum tool I've seen in my 21-year career that truly equips today's students with the skills they need to be successful."*
>
> **Principal, Bessie Allen Middle School, North Fond du Lac, WI**

Protecting student data

Before any student logs in, we sign a student data privacy agreement that meets the state's requirements. Schools own their data, and we never publish an individual student's responses. GRiTelementary uses whole-class teacher observations, not individual student data.
